

KTM 2011 XC-FLAUNCH

KTM

» 2011 250 XC-F & 350 XC-F

- The new XC-F's are based on the 250 & 350 SX-F and built with specific components and settings for cross country racing. They both feature the most current generation SX-F style frames including linkage rear suspension and the most current generation SX-F engines including EFI

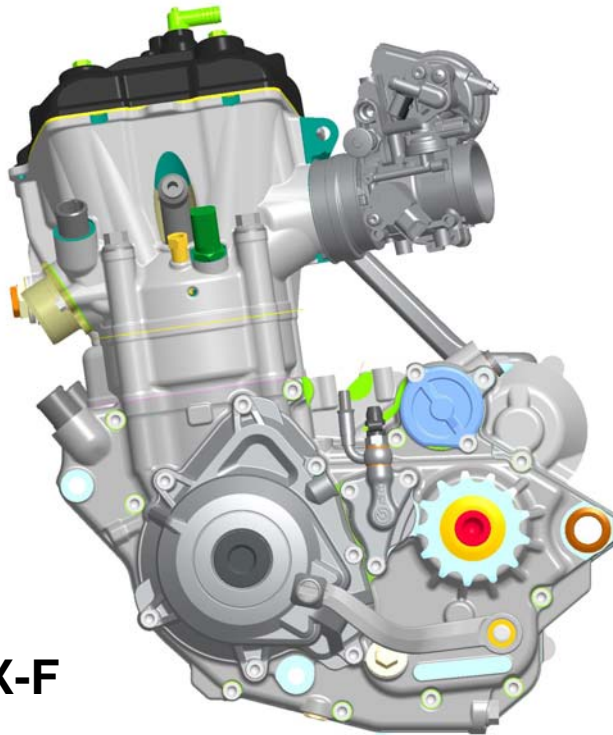

» 2011 250 XC-F & 350 XC-F Engine Details

- The XC-F engines feature both electric and kick start
- Electric start was added to the 250 XC-F
- Kick start was added to the 350 XC-F

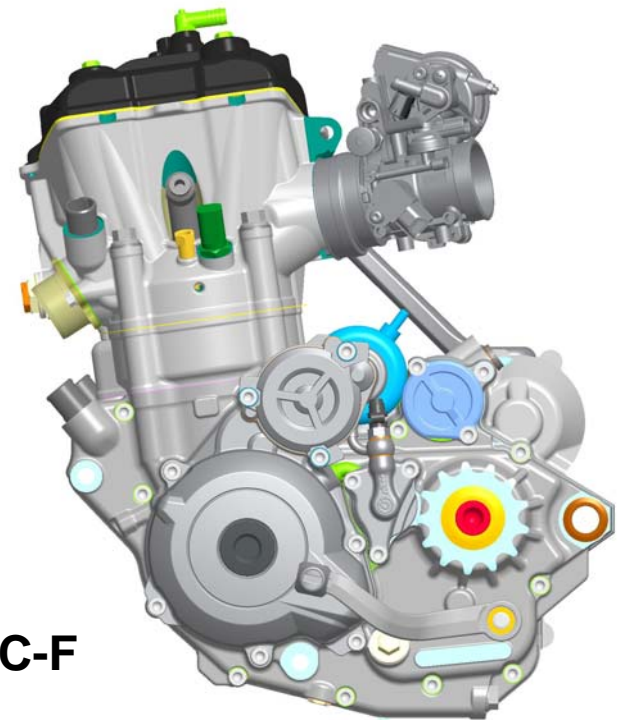

» 2011 250 XC-F Engine Details

- Electric start is new for the 250 XC-F compared to SX-F

SX-F

XC-F

» 2011 250 XC-F & 350 XC-F Engine Details

- Both engines are equipped with specific XC gear ratios
- 350 XC-F receives a 6-speed transmission
- 250 XC-F receives new final gearing 13:50 XC-F (13:48 SX-F)
- 350 XC-F receives a larger generator 168 Watt XC-F (66 Watt SX-F)

SX-F vs XC-F gear ratios

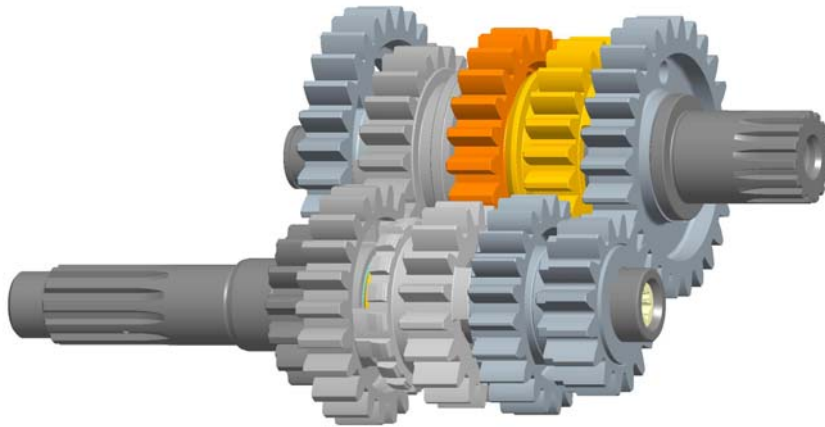

Gear	250 SX-F	250 XC-F
1	13:32	13:33
2	15:30	17:33
3	17:28	19:29
4	19:26	23:28
5	21:25	23:23
6	22:24	26:22

Gear	350 SX-F	350 XC-F
1	14:30	15:31
2	15:24	16:25
3	18:24	20:25
4	21:24	22:23
5	22:21	25:22
6		26:20

Engine Details

- 350 XC-F receives a 6-speed transmission

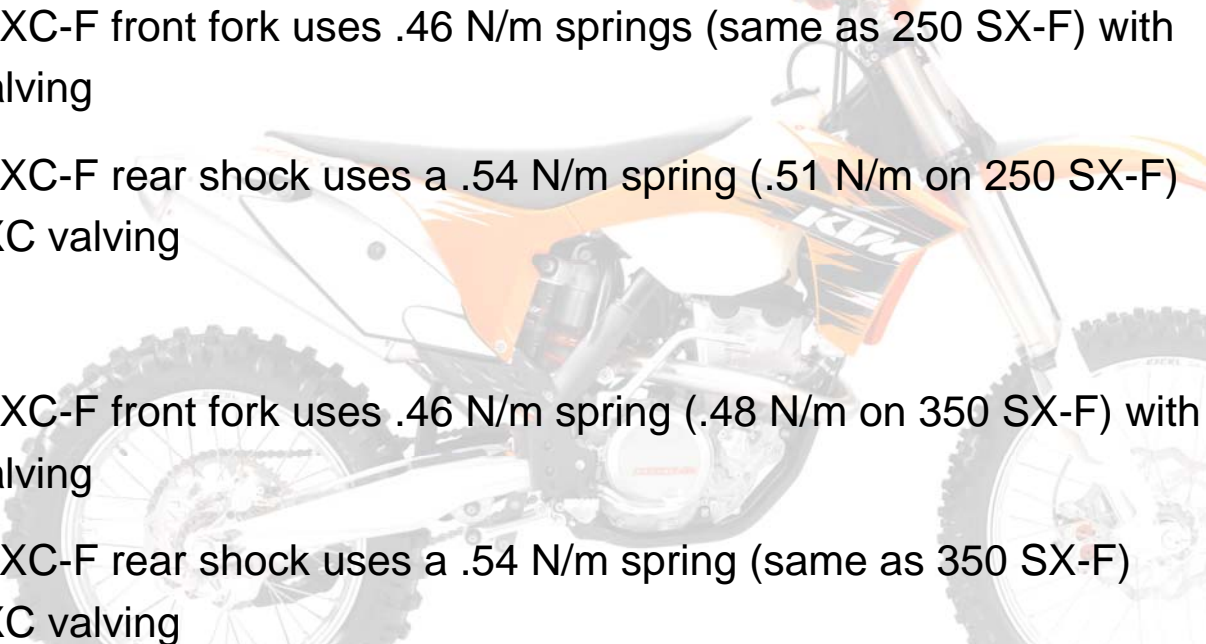

350 SX-F

350 XC-F

» 2011 250 XC-F & 350 XC-F Suspension Details

- 250 XC-F front fork uses .46 N/m springs (same as 250 SX-F) with XC valving
 - 250 XC-F rear shock uses a .54 N/m spring (.51 N/m on 250 SX-F) with XC valving
 - 350 XC-F front fork uses .46 N/m spring (.48 N/m on 350 SX-F) with XC valving
 - 350 XC-F rear shock uses a .54 N/m spring (same as 350 SX-F) with XC valving
- 

» 2011 250 XC-F & 350 XC-F Details

- 2.51 gal/ 9.5L transparent fuel tank (1.98 gal/ 7.5L used on SX-F)
- Open hand guards
- Side stand
- Both models - 80/100-21 Bridgestone M59 Front Tire (same as SX-F)
- 250 XC-F – 100/100-18 Bridgestone M402 Rear Tire (19" M70 used on SX-F)
- 350 XC-F - 110/100-18 Bridgestone M402 Rear Tire (19" M70 used on SX-F)
- Red Sticker Competition mapping
