

## Raising the Standard Taking your craft to a whole new level

Our newly designed aluminum PWC lifts are built for it all. The vertical lift design can handle deeper water and your largest of crafts—up to 5' 6" deep and 1500 lbs! Now boarding your craft has never been easier and safer with the open walk through design. Plus, it keeps your crafts safe, high above waves with a lift height of 56", so it's perfect for fluctuating water.

### THE SHORESTATION WINCH

Virtually unchanged for over 40 years, crank the 30" wheel for smoother lifting and dependability far superior to any ordinary winch.

### VERTICAL LIFT DESIGN

This design lifts your watercraft straight up therefore using less waterfront space than cantilever lifts, reducing cable wear, and making loading your watercraft easier.

### OPTIONAL FRONT END BOAT STOP

Bring your boat to a stop in the perfect position every time with this uniquely designed boat stop.

### OPEN WALK THRU

Safely and easily board the watercraft from the dock. No more climbing or tripping over the cross bars.

### PIVOTING BUNKS

These self-adjusting bunks pivot to cradle the watercraft's hull providing better support and evenly distributing the weight.

## SPECIFICATIONS

MODEL	LOAD CAPACITY	MAX. BEAM	LIFT HEIGHT	ADJUSTABLE LEGS	OVERALL WIDTH	SUPPORT LENGTH	SUPPORT CONSTRUCTION	MOTOR
SS1564M	1500 lb.	64"	56"	4 @ 19"	76"	7'	Carpeted Wood	—
